In addition to the Architectural Plans and specifications to be submitted as stated herein, there shall also be submitted for prior written approval by Beneficiary, Landscaping Plans and Site Grading and Drainage Plans which shall show clearly and in reasonable detail the proposed grading and landscaping as set forth below. Beneficiary shall have the right to refuse to approve any construction plans or specifications, and any landscaping and grading plans and specifications which in its judgment do not comply with the requirements contained in this Declaration in respect of the construction or maintenance of Dwellings and other Structures, or which in Beneficiary's sole judgment for aesthetic or any other reasons are not appropriate to the residential community developed or to be developed within the Property. Beneficiary has the right, in determining whether to give or withhold approval of plans and specifications submitted to it, to consider the desirability of the proposed construction, landscaping, tree removal, or grading in relation to other Dwellings and other landscaping and grading on the Property.

(a) LANDSCAPE PLANS. Three copies of a detailed landscape plan at a scale of one inch equals twenty feet (1" = 20'0") showing proposed plantings and trees (including size or diameter), existing trees (6" in diameter or larger), fully sodded lot including parkways, and location of parkway trees. This plan should be prepared in conjunction and be coordinated with the site grading and drainage plan.

All contractors and builders shall complete all foundation construction within a vertical tolerance of 6" above or 2" below that of the approved site plan (note, County Ordinances and Requirements may be more restrictive), the builder or contractor shall make no alterations to the approved site plan without prior written approval of Beneficiary, or its assigned engineer. The owner of the property agrees to remove, at his expense, any foundation that encroaches upon any front, side or rear yard setbacks or is over or under the 6" + 2" - vertical tolerance from the foundation elevation shown on the approved site plan.

The use of retaining walls, boulder slope walls, or other landscape features to achieve grade transitions is strongly encouraged. Such walls and features are especially effective and more aesthetic when they are constructed using natural material such as stone, granite boulders and heavy timbers. Retaining walls or slope walls and their proposed materials shall be specified in the owner's approved site plan.

(c) OWNER'S OBLIGATION. It shall be the owner's obligation and responsibility to notify building contractor and/or all subcontractors of any deed restriction or penalty that may occur because of violations as specified in the deed restrictions and shall hold Developer free and harmless from any and all costs that may occur because of these restrictions or violations.

If Developer does not approve or disapprove, or require a modification within the aforesaid 30-day period, then at the expiration of said period, the material submitted to Developer shall be deemed to have been fully approved by the Developer and the Owner who has submitted the material deemed to have been approved by lapse of time, shall have the right to proceed as if Developer's written approval has been procured.
